

REMARKS/ARGUMENTS

Summary of Amendments, Support, and status of claims

The specification has been amended to overcome all objections to the drawings and objections to the specification. The claims have been amended to overcome all objections and rejections of the claims. Claims 14, 16, 18-21, 40 and 44-46 remain pending.

Objection to the drawings

The drawings were objected to for not showing valve 117 and a means 88. The specification has been amended in the paragraph beginning at page 13, line 6 to change 117 to "17", which is shown by the drawings. The specification has been amended in the paragraph beginning on page 11, line 1 to delete reference to means for indicating 88 and claim 40 has been amended to delete reference to an indicating means. Reconsideration is requested.

The specification was objected to for not referencing callout 17. The specification has been amended as pointed out above to reference callout 17. Reconsideration is requested.

Claim Rejections

All rejected claims have been canceled. Reconsideration is requested.

Claim Objections

Claims 14, 16, 18-21, 40 and 44-46 were objected to as being depended on a rejected base claim but indicated to be allowable if rewritten in independent form including all limitations of the base claim and any intervening claims. This has been done in the most straightforward manner possible, with the exception of the deleted material in claim 40 as pointed out above. Reconsideration is requested.

Conclusion

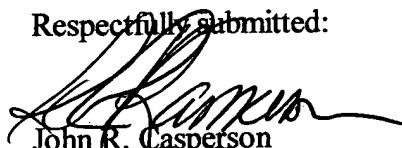

In view of the forgoing amendments and remarks, reconsideration and withdrawal of all grounds of objection and rejection and early notice of allowance is solicited.
